Executive Summary

The mission of the South Carolina State Election Commission (SEC) is to ensure every eligible citizen can register to vote and participate in fair and impartial elections, knowing that every vote counts and every vote matters.

This inaugural SEC Annual Report was compiled in the spirit of transparency to provide information and clarity and to assure all our state's citizens and stakeholders that the SEC is doing everything it can to accomplish its mission. Making the election process open to the public instills trust and confidence in the system.

The following pages cover topics of interest for citizens, legislators, constitutional officers, and other stakeholders, including:

- + Election Year in Review
- + Early Voting and Act 150 of 2022
- + Uniform Procedures and Regulations
- + Election Audits & Security
- + Support and Assistance for Counties
- + County Boards and Directors
- + 2022 By The Numbers

The SEC is required by S.C. Code §7-5-350 to report annually to the S.C. General Assembly information on certain actions taken to maintain the accuracy of the statewide voter registration database. This information, as listed below, is included in the 2022 By The Numbers section of this report.

- + Voters removed from the voter registration list and the reason for the removal
- + Voters placed on inactive status

- + Voters placed on archive status
- + New voter registrations
- + Voter registration updates, including elector address changes

The SEC would like to take this opportunity to thank the General Assembly and the Governor for their confidence in the agency and their continued support of our mission. We also thank the thousands of poll workers and election administrators for their hard work and dedication. Most importantly, we thank the millions of voters who continue to protect and preserve the democratic process by making their voices heard at the polls.

Thank you for your continued support,

Howard M. Knapp
Executive Director

Year In Review

OVERVIEW

As the U.S. Supreme Court has held, and every experienced election official knows, no election is perfect. It is an imperfect process run by imperfect human beings. South Carolina is no exception, but we truly believe our state's elections are the best in the country and are dedicated to ensuring we remain the best. The 2022 election year came with some specific and unique challenges:

- + Election Integrity – National controversies from the previous election cycle and the resulting loss of trust and confidence in the election process continued to impact the state.
- + Redistricting – 2022 was a reapportionment year. As maps were redrawn for districts throughout the state, congressional to municipal, affected voters' records were updated to reflect those changes.
- + Election Reform – The General Assembly and Governor enacted key election reforms making our elections more accessible and more secure. The most significant change, early voting, was implemented with less than three weeks before primary early voting was to begin thanks to the swift and steadfast efforts of state and county election officials.

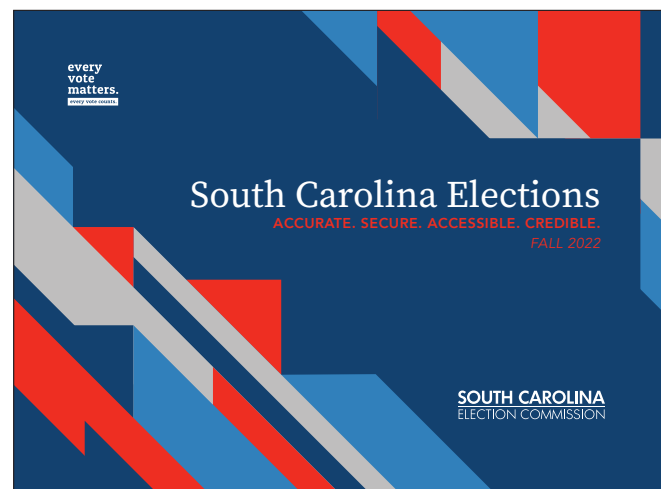

The SEC's focus in 2022 was to do what was necessary to restore trust and confidence in the election process and voting, so that the public could focus on the candidates and the issues affecting our state.

January

- + The members of the SEC unanimously voted to appoint Howard M. Knapp as the agency's next Executive Director.
- + SEC began simultaneously and successfully implementing new redistricting plans for Congress and S.C. House of Representatives. SEC instructs county boards to initiate state and local redistricting plans. SEC assists county boards with redistricting process.

February

- + SEC published the agency's first election integrity booklet detailing how the agency keeps South Carolina's elections accurate, secure, accessible, and credible. The 32-page booklet is available at [scVOTES.gov](https://scvotes.gov) and covers everything from voter registration and voting systems, to results tabulation and verification.

March

- + Candidate filing was a success across the state thanks to the SEC staff conducting numerous and extensive training sessions with county election officials. The sessions helped teach candidates how to file for office and how to process an application properly in the statewide candidate tracking system.

2022 Candidate Filing Data

Filing Location	Partisan Candidates	Nonpartisan Candidates	Total
SEC	97	11	108
COUNTY OFFICES	736	662	1,398
TOTAL	833	673	1,506

April

- + SEC held training workshop for county directors and board members in preparation for the June primaries and runoffs.
- + SEC began drafting updated agency regulations. Many existing regulations are obsolete and cannot be applied to current election technology or processes. The agency has made great progress in the process of repealing and drafting new regulations that more closely mirror modern processes and procedures.
- + SEC began drafting consolidated, standardized procedures for voter registration and elections. Agency staff are working to consolidate federal law, state law and existing agency policies and procedures into a single volume divided into various sections. Staff is working with experienced county directors to identify best practices and improvements and to ensure it meets the needs of both experienced and novice county election staff. We plan to complete the entire volume in 2023 with updates as laws change.

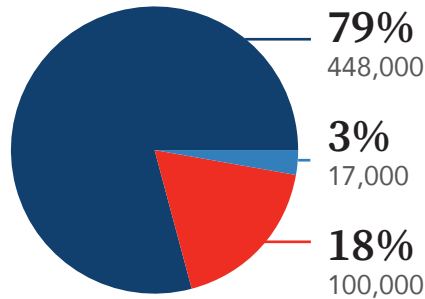

May

- + Governor McMaster signed the most substantial election reform bill in modern South Carolina history into law. Act 150 not only established a two-week early voting period, but it also reformed absentee voting, increased penalties for election crimes, and made other significant, positive changes to voting in South Carolina. While other states have taken more than six months to implement early voting, South Carolina managed to do it in 10 days, just in time for statewide primaries in June. This required extensive work from committed SEC staff to prepare robust voter education campaigns, fully instruct counties on new rules and procedures, create and update forms, and update the statewide voter registration system and internal processes and procedures.

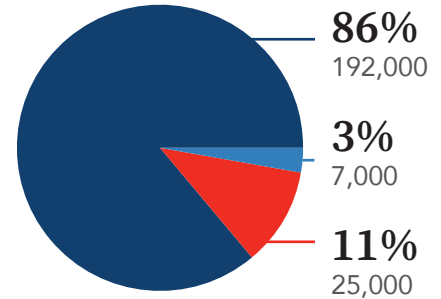

June

+ The statewide primaries and runoffs were a resounding success. Early voting was used for the first time in the state's history, and even with limited locations and time to educate voters on the process, more than 100,000 voters chose to vote early throughout the state.

Primary
566,000 voters (17%)

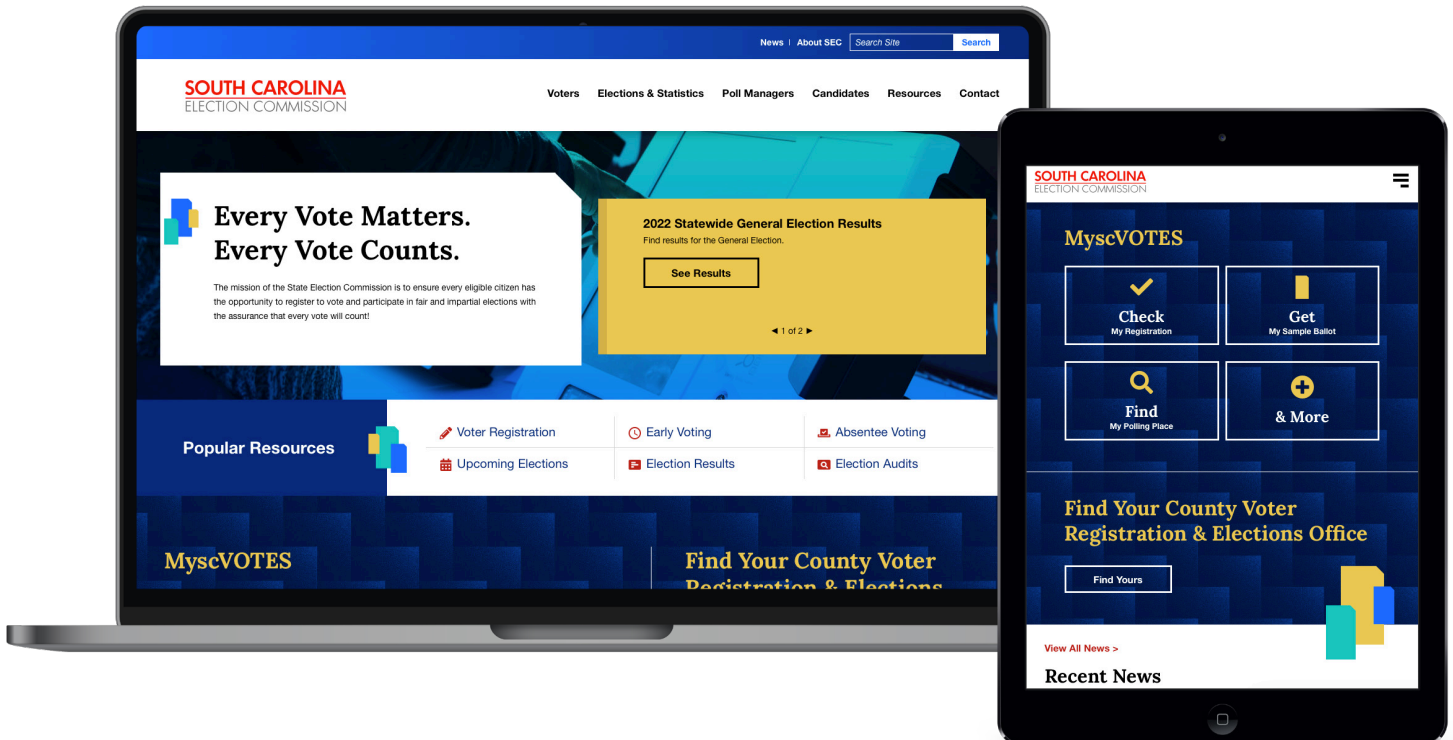

Runoff
224,000 voters (7%)

■ ABSENTEE ■ EARLY VOTING ■ ELECTION DAY

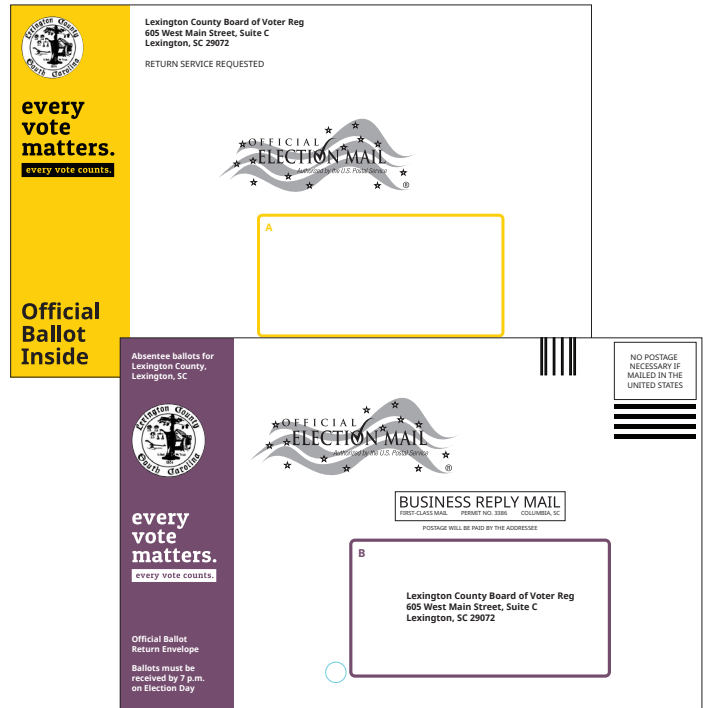

August

+ The SEC's website, scVOTES.gov, was updated in August to be more secure, accessible, easy to use, and compatible with mobile devices. scVOTES also includes an improved "MyscVOTES," which now allows voters to easily check their personal voter registration, sample ballot, and polling place in one convenient place. Absentee voters can also now use the new tracking tool in MyscVOTES to track their ballot's status, as well as sign up for status notifications via email and text.

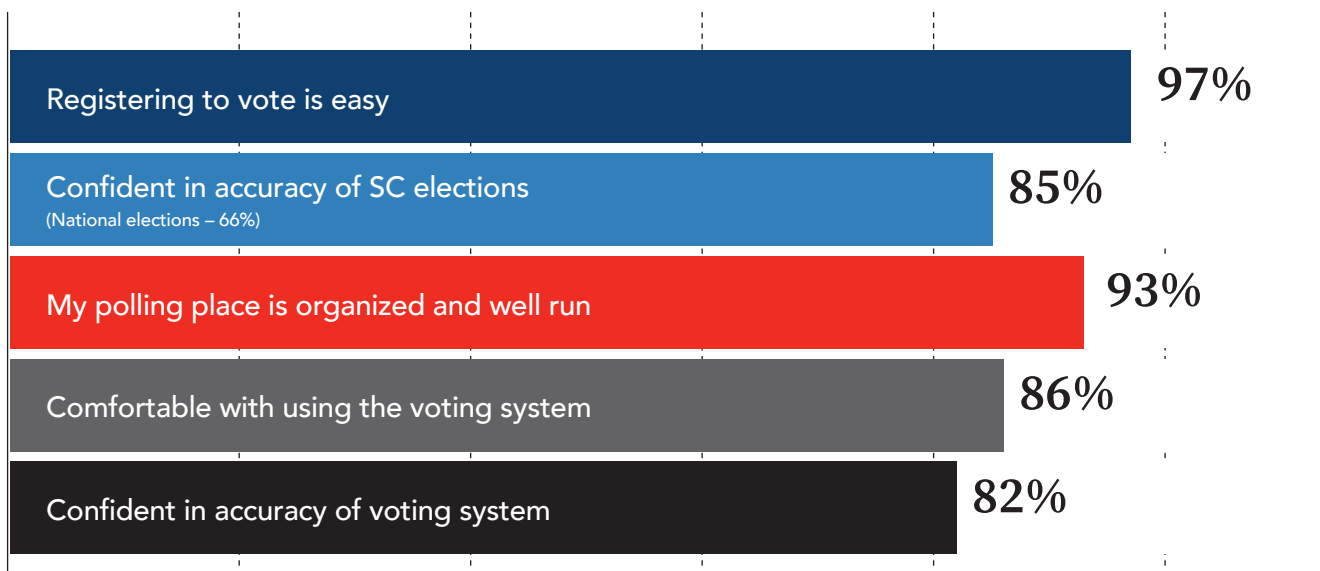

September

- + SEC holds training workshop for county directors and board members in preparation for the general election.
- + The SEC designed new absentee mailing envelopes used in all counties starting with the statewide general election. The U.S. Postal Service (USPS), industry experts, as well as other state and local election officials worked with the SEC to update the envelopes to comply with Act 150.
- + The redesigned envelopes provide clear, simple, and eye-catching reminders to help voters understand what is required for their vote count. Envelopes are color-coded so they can be easily identified as first-class mail by postal workers and also include USPS Intelligent Mail barcodes that allow for improved tracking on scVOTES.gov.

An **SEC survey of voters** finds South Carolinians feel it is easy to register to vote, that they are comfortable with using our voting system, and that they have confidence in the accuracy and integrity of the system. The survey found that while some believe voter fraud occurs in South Carolina and national elections, voters feel fraud occurs far less in our state than in national elections.

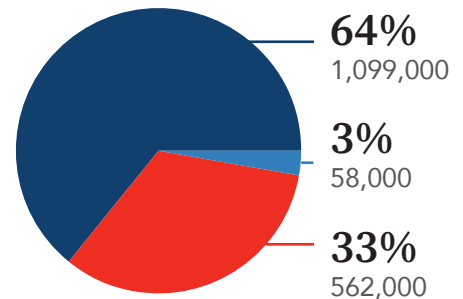

November

+ During the general election, more than half of all registered voters voted. Plus, more than a third of those cast ballots before election day through early and absentee voting. We credit this remarkable turnout, during early voting and on election day, to a robust voter education campaign that informed the public of the new laws and election changes. An informed public is a confident and trusting public. As a result, more than 560,000 voters took advantage of the newly established early voting periods, establishing a baseline for general election early voting participation.

Find more early voting statistics in the 2022 By the Numbers section.

General Election
1,719,000 voters (51%)

The significant early voting turnout relieved pressure on election day polling places resulting in a faster, smoother process for election day voters. Results were tallied and reported in a timely manner on the evening of the election. No state-level election protests were filed, and of the few local protests filed, none were successful.

The numerous successes of 2022 are attributed to the diligence, persistence, and commitment of the staff of the SEC. Unlike many government agencies that provide services to customers, every single SEC employee is also a customer, because they are also all voters. We all have a vested interest in successful elections and because we have “skin in the game,” we do everything we can to make them accurate, secure, accessible, and credible.

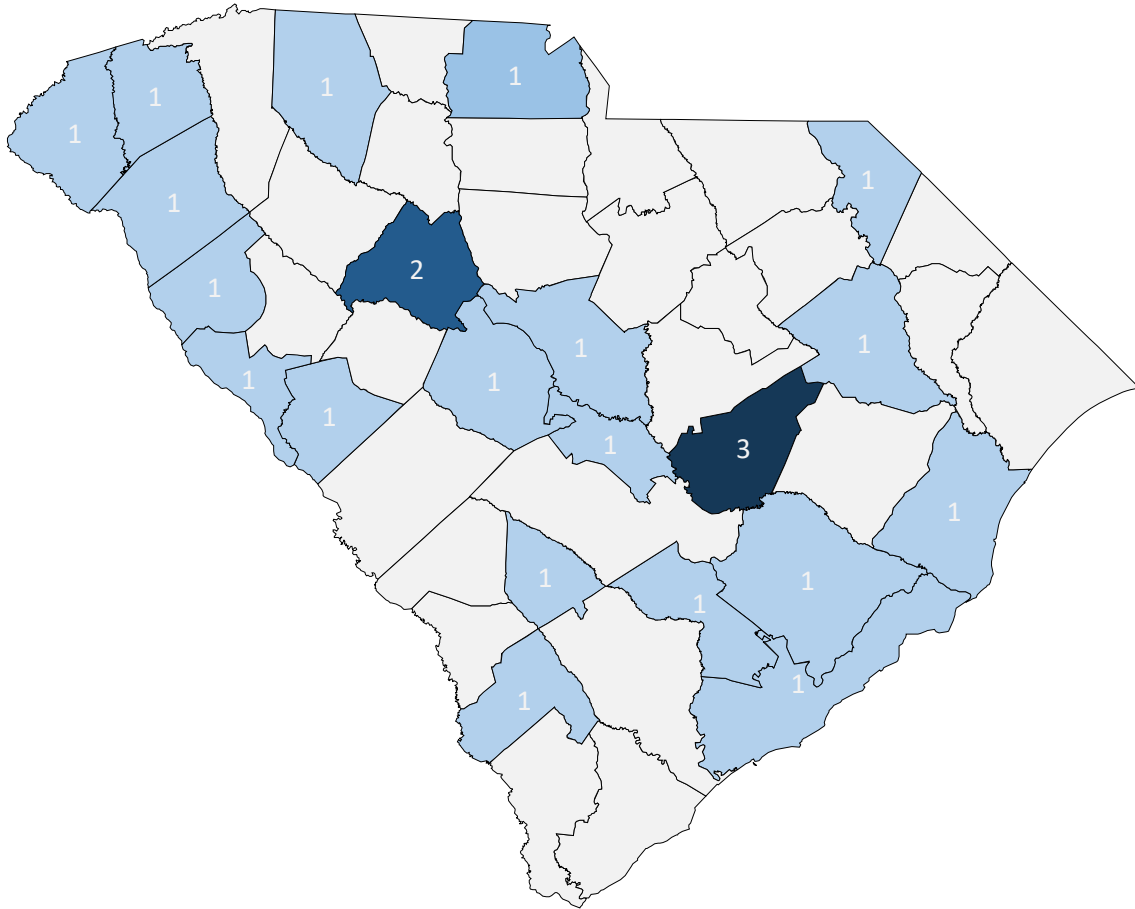

COUNTY ELECTION OFFICIALS AND POLL WORKERS

More than half of all the county directors in South Carolina have resigned or retired since January 2021.

Ongoing harassment, threats, and the stress of the job attributed to the unprecedented exodus. These factors have caused those vacancies to be filled largely by individuals with no previous election experience or those who have just been through their first general election cycle. This, in turn, has put a strain on the SEC’s resources and the ability to support counties that need additional training, election equipment and equipment maintenance, as well as other vital and necessary functions that come with running a county office.

State and county election officials work hard all year to ensure that elections are secure and run smoothly, but we can't do it alone. Election workers are critical to conducting fair and impartial elections. In the June primaries, there were instances of targeted harassment and intimidation of poll workers throughout the state, mostly by a few election watchers and

It is our patriotic duty to vote with civility and without disruption or interference.

observers. This kind of behavior not only violates state law by interfering with the management of an election, it also impacts our ability to retain experienced managers and recruit new ones.

Some poll workers overreacted to the harassment by all but barring poll watchers and observers, which is not productive and reduces transparency and trust in elections. Therefore, following the primaries, and for the first time in its history, the SEC issued detailed guidelines for poll watchers and observers. We also issued a joint letter with the State Law Enforcement Division to all county sheriffs and police chiefs making them aware of these issues. The SEC's message on this issue is clear: It is our patriotic duty to vote with civility and without disruption or interference.

Thanks to these efforts, the SEC received no reports of violence or harassment at polling places during the general election. Furthermore, South Carolinians continue to step up to serve, and poll manager shortages were not a statewide issue in 2022.

Financial Support of County Boards

As county government departments, county boards of voter registration and elections are funded by county appropriations. However, the State of South Carolina has provided tremendous financial support to county boards of voter registration and elections through the SEC's budgetary process. Since July 2019, when the current statewide voting system was purchased, the SEC has spent nearly \$100 million in county aid. This includes approximately \$78 million in voting equipment, \$16 million in reimbursed election expenses, \$1.5 million in county board member stipends, and over \$1 million in COVID Personal Protective Equipment ("PPE") supplies. Only the election expenses and board members' stipends are mandated by state law. Had the state not purchased the voting equipment and provided it directly to county governments, counties would have been required to purchase their own equipment, and that \$78 million would have come directly from county coffers.

SEC Aid to Counties Since July 1, 2019

Voting Equipment	Election Expenses	Board Member Stipends	Covid Supplies	Total Aid to Counties
\$78,448,976	\$15,527,299	\$1,481,902	\$1,017,090	\$96,476,088

See the 2022 By the Numbers section for a county-by-county breakdown.

ELECTION AUDITS

Two years ago, the landscape of the election sector completely changed as doubts about election integrity spread throughout the country. With the help and support of the General Assembly and the Governor, the SEC has made significant progress in improving the public trust in our elections. Last year, the General Assembly funded the agency’s entire budget request, which was focused on accountability.

Subsequently, the agency has been able to create its first audit division. This new division will serve to ensure all counties uniformly comply with federal and state election laws, as well as agency regulations, directives, policies and procedures. Once fully staffed, it will reform and restart county compliance audits to ensure county offices are following the law.

The SEC implemented independent results-verification audits statewide for the 2022 statewide primaries. These audits rely solely on the use of independent software to tabulate election

results from scanned images of voted ballots. Results from the independent tabulation are then compared to the results of the voting system tabulation. The results of these audits, for both the primaries and the general election, validated the results tabulated by the voting system.

The SEC also expanded its post-election hand-count audit program by nearly doubling the number of audits that were performed in the primaries (86 audits) for the general election (169 audits). Election officials publicly open the ballot box and count the voter-verified paper ballots by hand. Hand-count results are compared against voting system results to detect any errors. During the general election, 169 hand-count audits were conducted, accounting for more than 63,000 ballots, or roughly 4% of all ballots cast. For each of these audits, the number of ballots cast, as tabulated by the voting system, was validated by the number of hand-counted ballots.

2022 Hand-Count Audits

	June Primaries	General Election	Complete audit results are published at scVOTES.gov .
TOTAL BALLOTS CAST	683,288	1,718,626	
TOTAL BALLOTS AUDITED BY HAND COUNT	16,583 (2.4%)	63,224 (3.7%)	

ELECTION SECURITY

Elections face numerous threats from a wide variety of actors with various motives. The agency works with a partnership of state, federal and private cybersecurity professionals, as well as state and federal law enforcement, to take all reasonable measures to further enhance the state’s election security posture.

Major 2022 Achievements:

- + Vulnerability Disclosure Program. The SEC implemented a Vulnerability Disclosure Program (VDP). A VDP is a formalized process to identify and remediate potential cyber vulnerabilities identified by external security researchers.
- + Endpoint Protection. The SEC has installed the CrowdStrike Endpoint Protection System to increase the agency's ability to identify, detect, respond to, and remediate security incidents and alerts.
- + Risk and Vulnerability Assessments. The SEC had the U.S. Department of Homeland Security conduct assessments of the SEC to identify cyber vulnerabilities, determine susceptibility to phishing attacks, and determine risk and impact of an insider threat.
- + Physical Security Assessments of County Offices and Storage Facilities. The SEC and DHS conducted physical security assessments of the facilities in all 46 counties and the SEC. Results and suggested remediations were provided to each county office.
- + Security Posture Baseline. The SEC is surveying counties based on National Institute of Standards and Technology (NIST) standards to identify their current security posture. Results will be used to set a baseline expectation for county election security.

Cyber and Physical Security Partners

TRAINING

Without question, most of the issues on election day are a result of poor or non-existent training. In other words, the issues are mistakes that could and should have been avoided if proper training and preparation were established. It's easy to criticize a team for losing a game. Spectators can say, "If only..." or, "They should have..." But as any coach will say, victory begins with practice and training with the right equipment and support. That's exactly what the SEC aims to do.

With the support of the General Assembly and Governor through the pending budget cycle, the agency will be able to make substantial improvements to our statewide training program by creating a new training division. This division's primary responsibility will be to develop a more robust training curriculum

that is more accessible and recurrent for county election officials. This will be especially helpful to new directors who likely have new staff. Plus, as more people move to South Carolina, counties need more election equipment. That election equipment will need proper maintenance and support, which is why the SEC is also requesting more personnel to help counties manage their growing fleet of election equipment, including electronic poll books, ballot marking devices and ballot scanners.

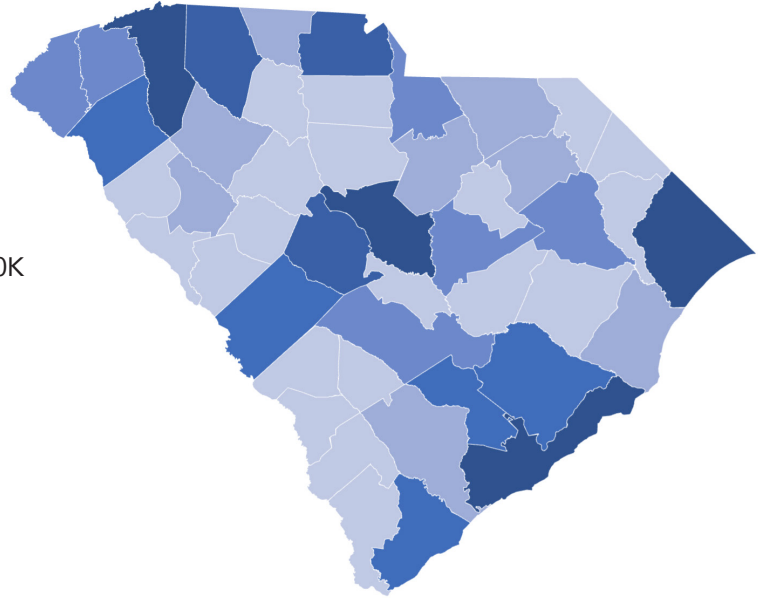

We are placing so much emphasis on training because we are committed to transparency and the belief that the more the public understands, the more trust and confidence they'll have in the election process and the voting results.

All executive branch agencies are required to complete their respective accountability reports soon after the start of each new fiscal year. Please note this report is not intended to replace accountability reports, which can be found on our website, scvotes.gov. This report communicates the “state of elections” in South Carolina while providing an accurate account of this agency’s efforts to ensure South Carolina continues to have the most secure and accurate elections in the United States.
